EDUCATION

SLC	Pyuthan
<i>Public English Boarding School</i>	Jun, 2010 - May, 2016
+2	Kathmandu
<i>New Summit College</i>	Jun, 2016 - Dec, 2018
Electronics, Communication and Information Engineering	Pokhara
<i>Paschimanchal Campus, IOE, TU</i>	Jan, 2018 - Present

PROJECTS

Personal Portfolio

It is a simple website build during learning of react and javascript and it was intended to showcase skills and leaning.

Used Tools and Technologies:
Reactjs Tailwindcss React-icons

<https://github.com/yogijagdish/personal-pprtfolio>

Money Calculator

It is a web based application build for learning purpose that authenticate the existing user or register new user and helps in calculating and keeping track of their expenditure and makes user easy for calculation regarding money.

Used Tools and Technologies:
Frontend: React Tailwindcss react-icons redux
Backend: Django Django-Rest-Framework

<https://github.com/yogijagdish/MoneyCalculator>

Trek Management System

It is a hardware and software based project where we have developed a website which collects the health and location data from hardware and displays it in a website.

Used Tools and Technologies:
Hardware: Arduino Uno
Frontend: HTML, CSS
Backend: Django

<https://github.com/yogijagdish/minor-project>

Electronics Health Record Management System Using RFID

It is a group project done as a final year Major Project. My role was to build the backend of the project and integrate this backend with the frontend of the project. I have used django and django rest framework for building the backend and creating api and integration of them was done using redux toolkit.

Used Tools and Technologies:
Hardware: Arduino Uno
Frontend: React CSS Redux
Backend: Django Django-Rest-Framework
